## FITOLOG SOFTWARE

The FitoLog software pack is a set of applications designed to facilitate the monitoring and programming and data from the FitoClima chambers. It consists of 3 applications: **FitoLog**, **FitoLogView** and **FitoProgram**.

### FITOLOG

Records and displays in real time all data and details related to the set-points, running variables and equipment behaviour.

### FITOPROGRAM

This application simplifies the creation of programs and its integration on the chamber ClimaPlus controller. Up to 20 programs, each with 50 segments, can be designed and linked to create detailed environmental profiles and simulations.

## ACCESSORIES

- Additional shelves
- Observation window
- Instrument vehicle/table (850mm X 400mm) with casters
